

The background of the entire page is a photograph of a coastal city skyline. In the foreground, there are lush green palm trees. Behind them, a marina with several boats is visible. In the distance, a tall, modern skyscraper with a yellow and white facade stands out against a blue sky with scattered white clouds. The overall scene is bright and sunny, suggesting a warm, coastal environment.

URGENT CARE

When a patient needs to see a physician urgently, but does not have a life threatening condition, and their doctors or specialist are not able to accommodate an immediate appointment, urgent care is the answer. it is often times cheaper to go to an urgent care clinic, rather than the er, where wait times may also be longer. call ahead to see what insurance they accept. also includes fee for service for uninsured patients.

STILL NEED HELP FIGURING OUT WHAT OPTIONS ARE BEST FOR YOU?

You may call 2-1-1, tampa bay's 2-1-1 call center, to talk with someone over the phone about the best choices for you or **visit www.211tampabay.org**. this resource lists hundreds of options that may help you find assistance in the community.

HEALTH TERMS YOU SHOULD KNOW

NETWORK

Your network is made up of the facilities and doctors your health insurer has contracted with to provide you with health care services. Your insurer wants you to use doctors that are a part of their network. Using providers **IN-NETWORK** lets you • Save on medical expenses • Choose from a limited group of primary care doctors, facilities, and specialists • Avoid paying higher co-pays, deductibles, and co-insurance payments if you choose a provider **OUT-OF-NETWORK**

PREMIUM

This is the monthly amount you pay for your insurance. If you do not pay it in a timely manner, you could lose your coverage.

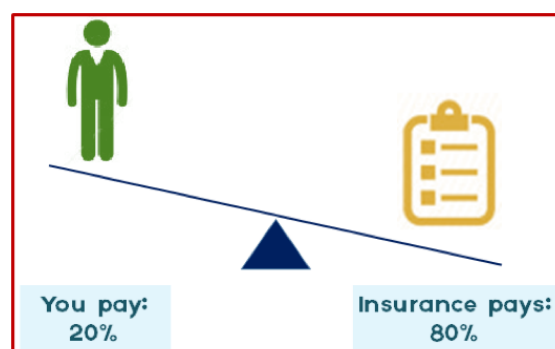

PRIMARY CARE DOCTOR

This is your regular doctor responsible for helping you maintain your health. It is up to you to schedule an appointment for preventative care or when you are sick.

CO-INSURANCE

This is separate from premiums and deductibles. Most insurance companies have some form of co-insurance, in which the insurance company pays for a percentage of the cost of medical treatment & you pay the rest.

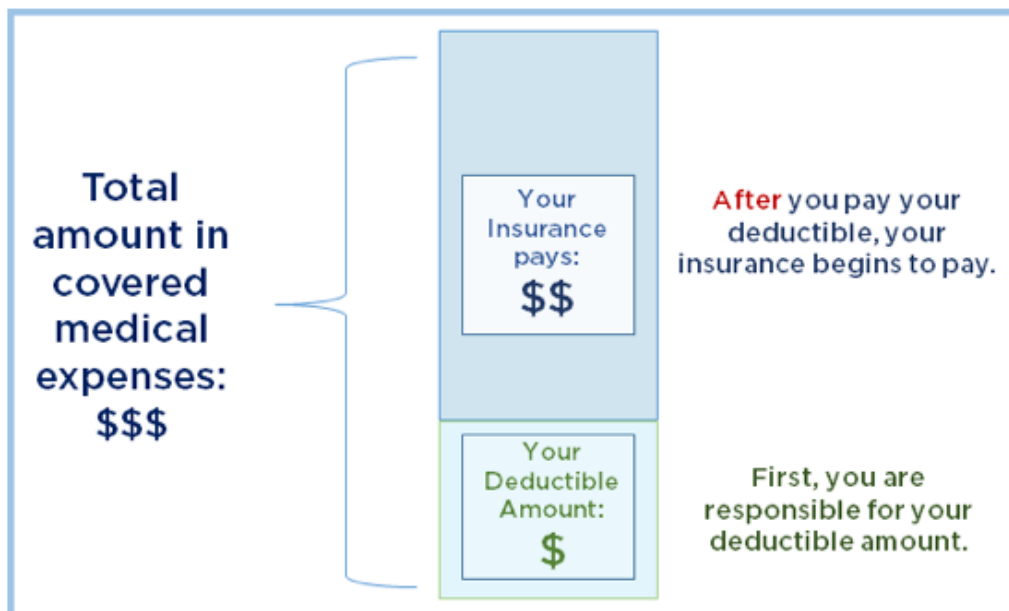

Example: If your plans allowed amount for an office visit is \$100 & you have met your deductible, and you have a co-insurance payment of 20%, you would pay \$20. Your plan will pay the rest

HEALTH TERMS YOU SHOULD KNOW

DEDUCTIBLE

The amount of expenses that must be paid out of pocket before an insurer will pay for any expenses. You can still always see your primary care doctor for the cost of your co-pay.

COPAY

This is a fixed amount you pay in advance for a covered health service. The fixed amount changes for different plans & types of services. Usually a co-pay is required for each visit.

Example: If your primary care co-pay is \$20, you will pay \$20 each visit.

OUT OF POCKET MAXIMUM

This is the most you will have to pay during a policy period (usually a year) before your plan begins to pay 100% of covered benefits.
